

We are the **U.K's leading independent inspection company**, providing statutory inspection throughout the U.K and overseas (also known as "insurance inspection") and consultation for all types of:

- Boilers and pressure systems.
- Lifts and lifting equipment.
- Local exhaust ventilation systems.
- Industrial doors.
- Risk assessment and testing
- LPG systems.
- Fire hydrants.
- Masts and towers.

Boiler waterside inspection.

High level lifting equipment inspection.

Ashdale inspectors undertaking training (IRATA) for high level work rope access

- We operate offices in Bristol, Milford Haven (Pembrokeshire) and Nottingham.
- Our safety record is exemplary.
- We have an open door policy, and welcome our prospective clients to see at first hand the facilities and services that we offer.
- All inspection work is carried out under the Company's **ISO 9001 : 2000 (Quality Assurance) registration** and **ISO/IEC 17020 (In-Service Inspection) accreditation**.

Req No: 087

Certificate No. Q 10799

The company is accredited (as a **Type 'A' body**) by the United Kingdom Accreditation Service (**UKAS**) to the **International Standard ISO 17020** (formerly BS EN 45004) for the In-Service Statutory Inspection of lifts, cranes and lifting equipment, boilers and pressure systems and local exhaust ventilation systems.

Ashdale Engineering's Quality Assurance system is also certified by the British Standards Institute under BS EN ISO 9001:2000.

What We Do

Under the **Health and Safety at Work Act** and successive regulations, certain equipment, representing a higher level of danger, is required to have periodic inspection by an independent and impartial “competent person”.

Kitchen Risk Assessment

LPG Tank NDT Inspection

Mobile crane inspection

Underground Walkway inspection utilising rope access

We carry out these inspections under:

- **LOLER** (Lifting Operations and Lifting Equipment Regulations 1998)
- **PUWER** (Provision and Use of Work Equipment Regulations 1998)

on all types of lifting equipment including:

- Passenger lifts
- Cranes (workshop and mobile)
- Excavators and JCBs
- Forklifts
- Vehicle hoists
- lifting accessories (tackle) e.g. eye bolts, slings, shackles

We inspect pressure systems under:

- **PSSR** (Pressure System Safety Regulations 2000)

This includes:

- Steam and high temperature hot water boilers
- Air receivers (compressed air systems)
- Buffer tanks and surge vessels
- Gas storage vessels.

Under the COSHH Regulations (Control of Substances Hazardous to Health) we test and inspect LEV systems including:

- Extract systems in garages
- Chlorine store rooms
- Pump chambers
- Fume cupboards
- Carpentry shops

We also carry out 'liability' inspections / Risk Assessments in a variety of areas including:

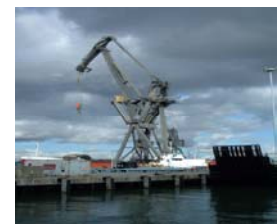

- Steel structures and walkways
- Legionella
- Commercial kitchens
- Bulk oil and gas storage.
- Playgrounds and gymnasiums

Boiler Tube Inspection

Fume cupboard LEV inspection

Dockside crane statutory inspection and structural examination.

Structural examination and load test of underground bridge

The Ashdale Way

Our multi-skilled inspectors, all permanent full-time staff, are strategically located throughout the UK. All are experienced and professionally qualified engineers, who are assigned to inspection tasks on the basis of proven expertise, and are able to undertake:

- Working at height
- Confined space
- Working in all conditions

We offer both a commitment to on-time completion of contract work and to a 24 hour a day, 365 days a year emergency service for urgent non-planned requirements.

As experts we are always happy to do a presentation to Client staff on what is involved in statutory inspection including which equipment comes under the regulations, *and* which does not, and the methodology behind our work
