Our services

Our comprehensive inspection services include:

- Lifting equipment under LOLER 1998 and PUWER 1998. This includes goods and passenger lifts, stairlifts, patient hoists, window cleaning equipment, mobile elevated work platforms, vehicle lifts, and lifting accessories.
- Escalators under the Workplace (Health, Safety, and Welfare) Regulations 1992.
- Pressure systems under PSSR 2000. This includes steam and hot water boilers, compressed air systems, refrigeration plant.

All the inspection work is carried out under the Company's BS EN 9001 (Quality Assurance) registration and ISO 17020 (In-Service Inspection) accreditation.

- Drawing up and reviewing written schemes for Pressure Systems (and where required for Lifting equipment.)
- Local Exhaust Ventilation assessment and testing under COSHH 2002, including where required Initial commissioning report.
- Other work equipment under PUWER 1998. This includes industrial doors, hangar doors, fire hydrants, LPG systems and commercial catering equipment.
- Playground equipment.

Risk assessments

We also specialise in undertaking workplace risk assessments including:

- Legionella risk assessments (we are full members of the Legionella Control Association)
- Workshop risk assessment.
- Industrial kitchen risk assessments.

We can go wherever you need us:

We have a specialist team of IRATA trained inspection engineers. All our engineers are confined space trained and occasional climber certified.

Our engineers are a minimum of SC level security cleared.

Like you, we focus on building relationships with our clients. We work around your needs to ensure that your clients' sites remain statutorily compliant, with inspections carried out on time and with the minimum amount of disruption.

We are experts in our field and have extensive experience of providing inspection services in a wide range of public and private sectors

Our Engineers are all full-time permanent employees, drawn from a wide variety of engineering backgrounds. They include Chartered Engineers, ex British military personnel and industrial specialists. This wide range of specialism's and experience means that we understand the requirements of your industry and the sectors in which you operate.

Ashdale Engineering UK Ltd is a Type A UKAS inspection body. All our inspection services are carried out under our quality assurance registration (BS EN 9001) and in-service inspection accreditation (ISO 17020).

Our nationwide team of professional engineers cover every postcode in the U.K, with the capacity to work overseas wherever necessary.

We are experts in our field and have extensive experience of providing inspection services in a wide range of public and private sectors, including education, healthcare, leisure, manufacturing, utilities and property management.

If you would like more information on how we can help you meet your compliance obligations and maintain a safe working environment.
